

FOLIAGELINK

"Your Complete Order Processing Network"

Serving the Tropical Plant Industry

Dear Plant Brokers and Buyers,

Now you can place and process your plant orders online in real time from any computer, laptop, tablet or smart phone using the FoliageLink network. That's right, all you need is an online connection and you can work from anywhere in the world, even on an airplane. There is no software to buy and the platform is easy to learn and easy to use. This "cloud" based network allows you to securely log in to your account from any terminal and place multiple orders at once. You can easily edit items and sources, print p.o's, and manage invoices to email or print. You can even send your freight carrier a source pickup list with one click. Try the service, it's free to use and we think you will love what it can do for you! Over 100 nurseries in Florida have been reliably receiving orders via the FoliageLink network and the list is growing.

Sign up at www.foliagelink.com. Enter in your email address and get started. Most new users report learning the program within an hour or two. *We recommend reviewing the user instructions located on the top navigational bar. If you need assistance, we are here to help.*
